

Space Available

The right location and the right space can make all the difference for your business. Consider Scottsville.

This small town boasts a diversity of commercial property at a great value. There are high-traffic opportunities on Route 20, architectural gems in the historic district, and open land for new construction. The Town’s commercial zoning allows a wide range of uses by right; there are also home occupation and specific business types allowed in residential areas. Take a look at these spaces, and contact Town staff if we can be of any assistance.
